

RTFM Bar Runner

Moin! Welcome to the 33c3 bar runner team. Even if you've been a bar runner/bar support angel during the previous congresses please take the time to read the following instructions carefully. If in doubt, **please ask!**

Safety first!

- In case of an accident or medical emergency, call the CERT DECT 112
- If you don't have work gloves, ask for them we have a few in stock.
- Please be careful during pallet jack operation! If you are not comfortable operating it, ask a fellow angel. If you need an introduction ask your nearest bar supervisor.
 - **maximum** loading height is **two** boxes! Yes even empty boxes, trust us ;)
 - never walk in front of the pallet jack down the ramp
 - be careful with the operation height of the pallet jack especially at the end/beginning or intermediate stop of the ramp or you will hit the ground and drop a lot of bottles.
 - Protect yourself! We can cleanup broken bottles and crates but we don't like to fix broken angels.

34C3 advanced operation mode

For the first time we have an bar order system. All bars are equipped with tablets to order supplies. The orders will be printed at the BOC in hall 4. You can pick up your orders here and deliver it to the bars. If the system is down for an unforeseen reason, we still have a phone backup system in place.
